# Hall of Tiles

# Introduction

We invite you into this space of a surreal sense of scale, and we challenge you to temporarily suspend your sense of belief and reality.

Engage your imagination and awaken the child within you, and push the boundaries of what tiles can be. Tiles need not be simply floor or wall coverings. Perhaps think of them as standalone pieces of installation – framed as sculptural pieces that surprise any visitor to your space.

### Story

The name Porphyry comes from the ancient Greek meaning purple, a colour frequently found in this type of rocks, along with red, brown and grey. It is this rock that has inspired the Porfirica collection. Porphyry is a magmatic material formed by the cooling of lava flows. It has an extremely variegated, complex composition, on which is created a "porphyritic" (porfirica in Italian) structure that also comprises minerals and crystalline elements.
