### AR CHE OLO GIE

Enrica Corvaton  
Zaven  
The exhibition is a collection of objects that tell the story of the past through the eyes of the present. It is a journey through time, from the ancient to the modern, from the simple to the complex. The objects are arranged in a way that allows the viewer to see the evolution of design and the influence of the past on the present.

### CEDIT CERAMICHE D'ITALIA

"The culture of beauty, art, architecture and design are CEDIT's DNA."

Following an intensive series of studies, collaborations and expert knowledge of the Italian ceramic tradition, CEDIT has been able to create a series of objects that are both functional and artistic. The objects are designed by some of the most important Italian designers of the 20th century.

# Retail Corridor

# Introduction

Retail experience anywhere can often feel terribly transactional. At the Retail Corridor, retail is reimagined as a spectacle (as it should be!) – bringing to life not only what you need, but what you dream and desire.

Transform any display and space by mixing, matching, curating, and assembling tiles of different design, texture, sizes and colours by tile designers from all over the world. Tap into our often-hidden fun and playful shelves.

Listen to your subconscious, and allow yourself to be transported to the immersive Retail Corridor.

#### Story

The Policroma tile collection of large slabs features motifs inspired by two separate sources: on the one hand the exquisite, always surprising vein texture of some specific metamorphic rocks, and on the other the sophisticated colours of Marmorino plaster. In spite of their different natures, these two materials are embedded in the culture of Italian architecture.

Designed by Cristina Celestino.

### Story

Works of art can be placed at the service of decoration, allowing the construction of true large pictorial “environments”. In the “Archeologie” tile collection, the porcelain stoneware surfaces take on the consistency of a new, extraordinary space in which the author transfers and deposits a few key traits from his personal artistic poetry, developing a range of modern coverings that have the appearance of a coloured surface destined to survive the tests of time and become a memory.

Designed by Franco Guerzoni.

Modular Wall Feature Rilievi #3 Tortora Wall Salvia Floor Sabbia

## 09. Rilievi #3 Tortora

**Brand:** Florim

**Collection:** Cedit Rilievi

**Dimension:** 360x350x50mm

**Material:** Glazed Porcelain Tile

**Origin:** Italy

**Application:** Wall

**Variation:** Shade Variation

**Finish:** Matt

---

### Story

Rilievi is a work of design balanced between different historic periods: while the volumetric relief tile modules are inspired by artistic experiments conducted in Italy during the Sixties and Seventies, the large slabs are the outcome of research into materials and technology that has only come to fruition in very recent times. The shadow effects generated on the surfaces of the slabs by the light striking the projecting parts of the modules create an unusual impression of architectural depth found virtually nowhere else in ceramic coverings, laying the bases for a new decoration interior design language.
